SOLO AUTOMA – COMPONENTS AND RULES OVERVIEW

Automa Design by Dukefanblue2005 (BGG). Marvel Splendor re-theme by Shamus (BGG).

COMPONENTS

-12 Automata Cards
- 1 Token Placement Board

SETUP

1. Setup the game as per the normal two player rules. Place the tokens on the token placement board.
2. Search the automa deck for the four cards with the gold stars on the bottom right of the card. Shuffle those four cards and add two to the rest of the automa cards. Place the other two star cards into the box. Shuffle the newly created deck of ten automa cards and place them near the game area.
3. You are now ready to begin playing.

GAMEPLAY CHANGES

1. You have a MAXIMUM of 30 turns to reach 16 Infinity points and assemble the Infinity Gauntlet.

2. The Automa (Thanos) goes first each turn and begins by flipping over an automa card. After the Automa has taken its turn, the player takes their turn. At the end of a turn when both the Automa and player have gone, **check** to see if either have 16 Infinity points and six different Infinity Stone cards. **If so**, apply the normal game winning conditions. The Automa wins if there is a draw (Thanos is victorious!).

If not, continue to the next turn.

3. The Automa will not claim Location tiles but **will** claim the Avenger Assemble tile.

4. At the start of the 31st turn, the player loses.

HARD VARIANT

Play as Thanos and attempt to assemble the Infinity Gauntlet before the heroes (the Automa) can. In this variant, you do not claim Location tiles (Thanos has no need) but the Automa will claim Location tiles as soon as it has the required Infinity Stones. Other aspects of the solo automa play the same.

AUTOMA CARD BREAKDOWN

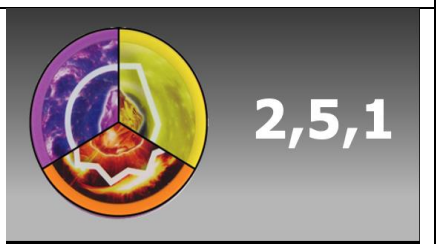

1. Each automa card has three sections. Each section represents the 1st, 2nd or 3rd phase of the game. For the first 10 turns, only look at the top section (noted in green with a "1" on the left) of the automa card and perform that action when a card is flipped. Once you have gone through 10 turns, shuffle the automa deck and go through it again. This time look at the middle section (yellow with the "2") of the card. The 3rd, and final, phase is similar but looking at the action on the bottom of the card (red with the "3").
2. There are two possible actions when flipping over an automa card – taking tokens or gaining cards.
3. **Taking Tokens** - When this action is revealed look at the numbers to the right of the token on the card. Take those tokens from their respective stacks on the token placement board and stack them up in the automa play area. Each time the Automa takes tokens it will stack them on top of any previously claimed tokens in the order noted on the card. In the event that the automa card says to take tokens from a pile that has run out just ignore that number and take the remaining numbers on the automa card. It is legal for the Automa to have more than 10 tokens.
4. **Gaining Cards** - When this action is revealed the default action is that the Automa takes the corresponding card from the play area and discards a number of tokens as specified on the card. However, if the Automa already has a card with the **same** Infinity Stone colour as the initial card choice, it will take a different card with a stone colour it doesn't have from that row (looking from left to right). If the row has no suitable alternative card, the Automa will default to the originally drawn card.

Always discard tokens from the **bottom** of the automa token stack. The Automa will claim a card even if it can't discard the total number of tokens specified on the card. For example, the Automa will still claim a card even if it has no tokens to discard. Once claimed, if the card claimed has Infinity points or an Avenger Assemble symbol on it, place it in the automa play area. If it doesn't, you can place the card back into the box or to the side. You only need to keep track of the cards in the automa play area.

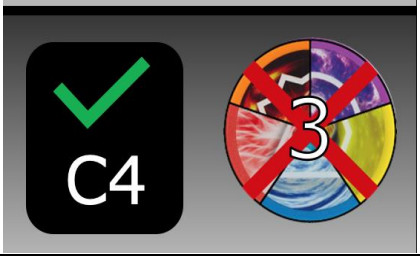

TAKING TOKENS ACTION

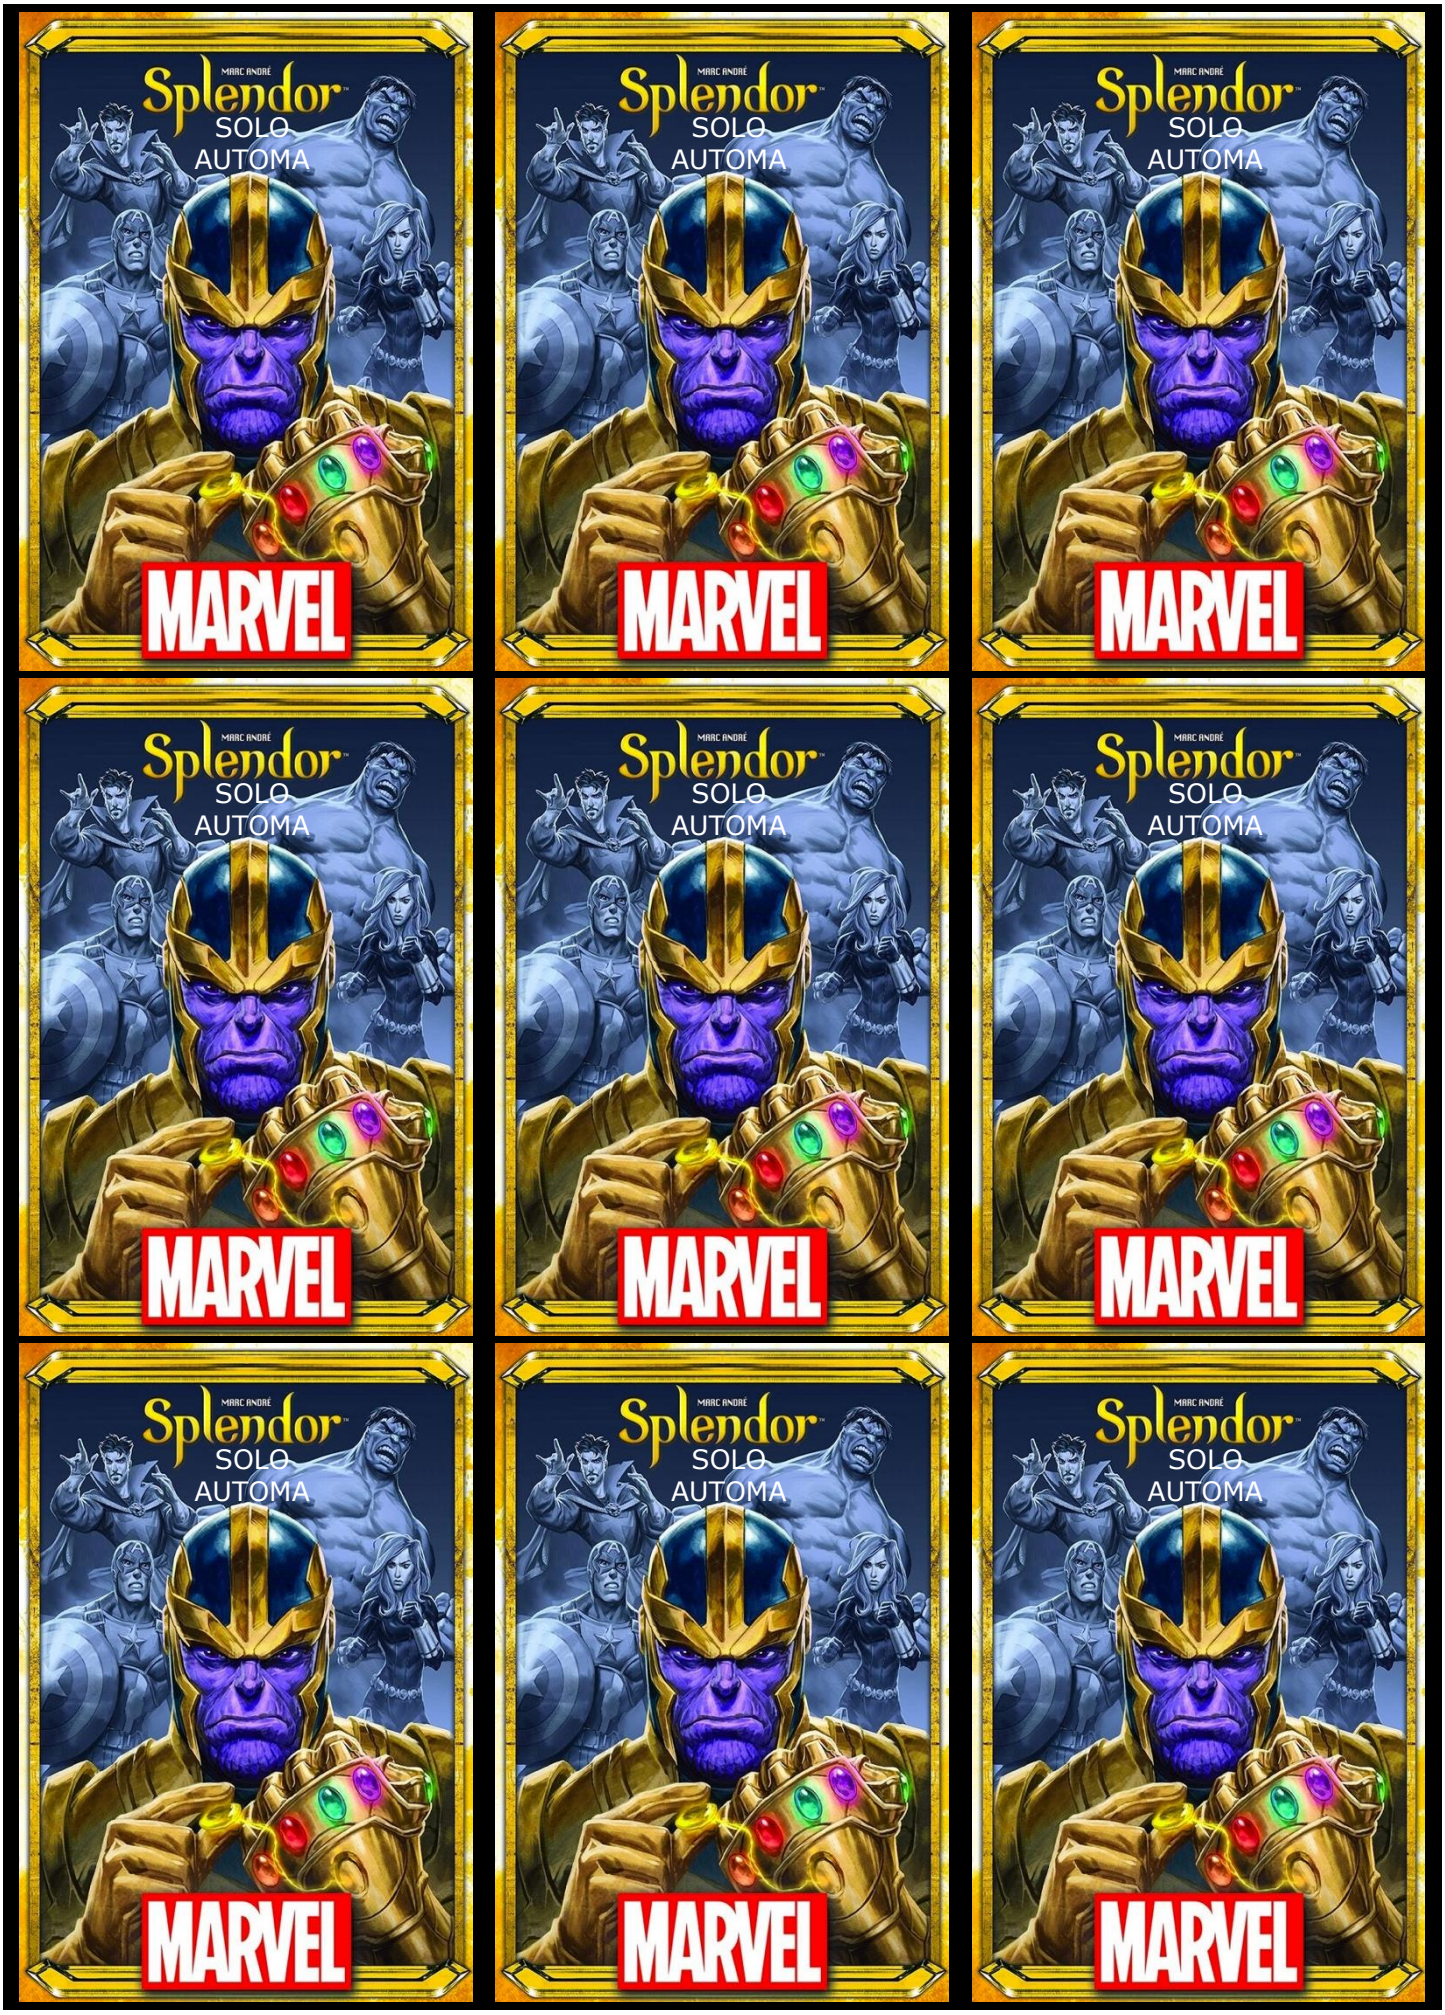

(Add tokens 2, 5, 1 to the automa token stack)

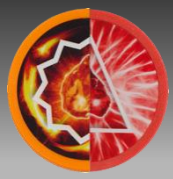

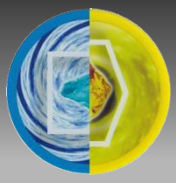

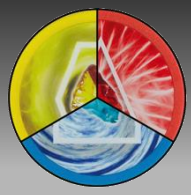

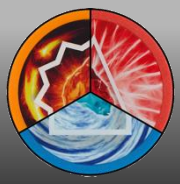

GAINING CARDS ACTION

(Take card from C4. Discard 3 tokens from the bottom of the automa token stack)
